

A spectrum of technology solutions and services.

We are a managed service provider that support a large array of companies, both public and private sector, along with a number of charities.

### Offers to CRA Members

Contrac are offering the following services free of charge to CRA members:

- Virtual servers (max 10) free of charge within ContracCloud for 3 months.
- Assessment of your IT estate, to give you a review of your current landscape and license position.

### Remote Working

Make sure you are focused on business continuity by enabling your remote workers rather than struggling to source vital hardware that is normally as easy to buy as bread. We have a substantial inventory of business grade laptops, available for immediate order.

Stay agile and flexible with our Remote Worker Offer and Support Packages. We are here to help, contact us for more details.

The graphic features a black and white photograph of a man wearing glasses and headphones, smiling and gesturing with his hand. The right side of the graphic is a dark grey/black overlay with white and pink text and icons. It includes the Contrac logo, the headline "We are here to help Remote Worker Offer Immediately available", icons for a laptop and a headset, and details about the offer: "Business grade laptops 8Gb RAM, Win 10 Pro, From £480 exc VAT" and "Remote Support £49 / month". It also includes a note about a finance package and contact information.

### **Collaboration**

Microsoft Teams – if you need collaboration tool whilst working remotely and is either new to MS Teams or would like to look at Teams let us know. We can get you set up remotely and walk you through the product.

### **Security**

In uncertain times, the role that technology plays in human life is becoming an increasingly urgent question. We have a number of leading CCTV with AI technologies that can:

- Temperature monitoring and alerting. Dahua Technology has been an early participant in the epidemic prevention and control in Asia, as it has joined the global effort to help combat the virus and help to minimise its impact.
- Health and Safety PPE identification and alerting.
- Perimeter monitoring with laser sensors and response to site services.
- Ownership and rental options available.

### **Digital Transformation**

We work with customers that are on a digital transformation, from inception through to delivery.

### **SEO Optimisation**

We are able to offer full search engine optimisation across your web and social channels.
